

**Amendments to the Sepcification:**

Please amend the specification by inserting the following paragraphs after paragraph [0036]:

[0037] Integrated e-mail booking system includes software and/or hardware that may be used to store a formatted e-mail form on any email or internet accessible system A traveler may then access the form, fill out the trip details, and then e-mail the completed form to an identified email account. The system or travel counselor may then access the email account and process the booking using trip planning module. This email booking system greatly reduces the time it takes the traveler and the travel agency to process a reservation
